

Huawei P8 Front Camera Replacement

This guide shows how to replace the front camera in your Huawei P8 smartphone.

Written By: Dominik Schnabelrauch

INTRODUCTION

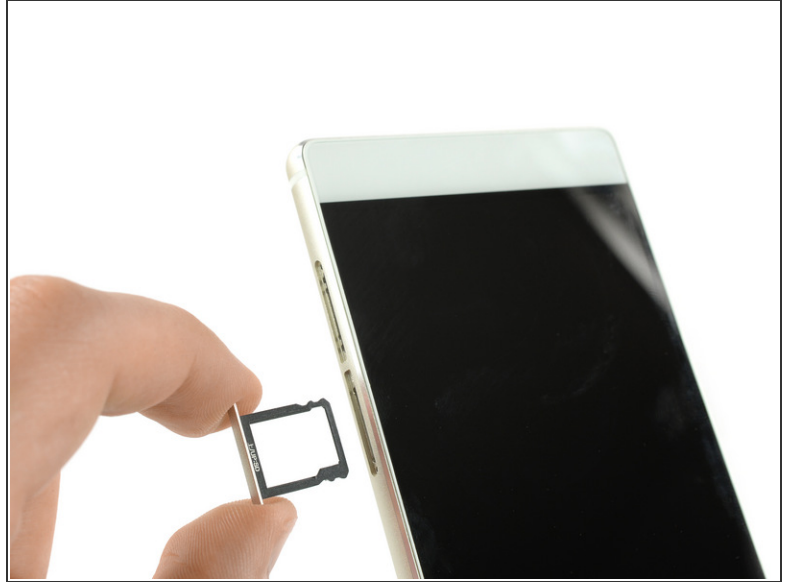

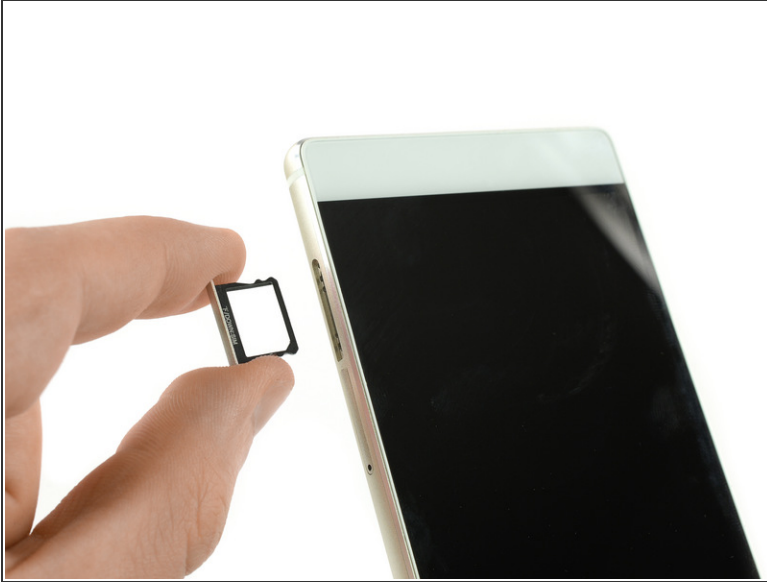

Use this guide to replace the front camera in your Huawei P8.

TOOLS:

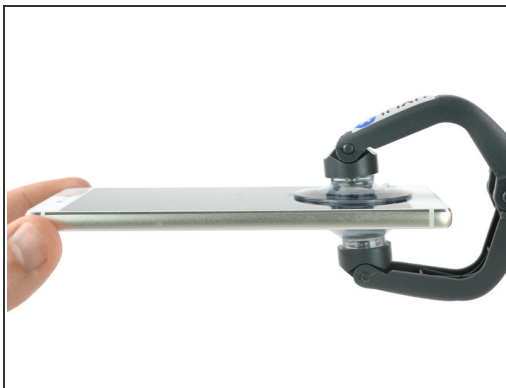

- [Spudger](#) (1)
 - [Tweezers](#) (1)
 - [SIM Card Eject Tool](#) (1)
 - [Phillips #000 Screwdriver](#) (1)
-

Step 1 — Huawei P8 Battery Replacement

- First switch off your phone.
- Remove the trays for the SD card and the SIM card.

Step 2

- Unscrew the two Pentolobe P2 screws located at the bottom next to the device's USB C port.
- ⓘ If the screen is cracked you might want to use some tape to protect your eyes from glass shreds and get a better grip to open the phone.
- Use an iSclack or a suction handle to separate the display unit from the rear panel.

Step 3

- Unscrew the Phillips #000 screw that holds down the metal clamp covering the front camera connector.
- Remove the metal clamp covering the flex connector of the front camera.

Step 4

- Unplug the headphone jack and the front camera flex connectors.
- Remove the front camera.

To reassemble your device, follow these instructions in reverse order.
